

LifeSPARC Program

Launch Plan

As part of your LifeSPARC purchase, the LivaNova team is here to partner with you to ensure a smooth and successful launch. In addition to device education, a variety of resources are available to you during this launch phase.

Our Commitment to You.

PRE-LAUNCH CONSIDERATIONS

- ☐ Review LivaNova ACS Coding Guide
- ☐ Account reviews or prepares applicable policies, procedures, orders
- ☐ Site Situation Analysis to evaluate current status and identify barriers to launch
- ☐ Launch Plan creation

Pre-Launch Resources

- ☐ LifeSPARC Procedure Guide
- ☐ User Supplied Equipment List
- ☐ ECMO Cart Content List
- ☐ Tentative training agendas

LifeSPARC LAUNCH

LifeSPARC Education

- ☐ LifeSPARC Product In-Service
- ☐ Basics of ECMO
- ☐ Advanced Education

LifeSPARC Reference Guides

- ☐ LifeSPARC and associated product DFUs
- ☐ LifeSPARC Operations Manual
- ☐ LifeSPARC Device Management Guide
- ☐ LifeSPARC Alarm Guide
- ☐ LifeSPARC Circuit Emergency Guide
- ☐ ECMO Troubleshooting Guide
- ☐ ACS Quick Reference Guides
- ☐ LifeSPARC Self Assessments
- ☐ SAMPLE Flowsheet
- ☐ SAMPLE ECMO Order Set

VIRTUAL RESOURCES

LivaNova Learning Hub

Multiple educational videos and downloadable resources related to LivaNova ACS products.

LivaNova Academy

Learning management system with a variety of modules covering basic principles and clinical application courses related to ECMO and MCS

LivaNova GoTo Stage Webinars

On-demand, previously hosted educational webinars. Topics include Fundamentals of VA and VV ECMO, ICU Considerations for the ECMO Patient, and more.

Extracorporeal Life Support Organization (ELSO)

International consortium providing educational resources, guidelines, publications, etc.

Indications and Safety Information

The LifeSPARC System is a centrifugal blood pump system intended to assist in circulation of the patient's blood when part of an extracorporeal circuit including physiologic gas exchange of the patient's blood in adult patients with acute respiratory failure or acute cardiopulmonary failure, where other available treatment options have failed, and continued clinical deterioration is expected or the risk of death is imminent. These may include:

- Failure to wean from cardiopulmonary bypass following cardiac surgery in adult patients
- ECMO-assisted cardiopulmonary resuscitation in adults
